This product conforms to the EMC Directive 89/336/EEC and the Low Voltage Directive 73/23/EEC.
The complete Declaration of Conformity is available from Ohaus Corporation.

Este producto está en conformidad con la Directriz EMC 89/336/EEC y con la Directriz para Bajo Voltaje 73/23/EEC.
La Declaración de Conformidad completa está disponible a través de Ohaus Corporation.

Ce produit est conforme à la directive EMC 89/336/EEC et à la directive de basse tension 73/23/EEC.
Vous pouvez obtenir une déclaration complète de la conformité auprès de Ohaus Corporation.

FCC NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.

CANADIAN NOTE:
This class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

AS/NZS4251.1 AS/NZS4252.1 Emission and Immunity 13123

ISO 9001 Registration
In 1994, Ohaus Corporation, USA, was awarded a certificate of registration to ISO 9001 by Bureau Veritus Quality International (BVQI), confirming that the Ohaus quality management system is compliant with the ISO 9001 standard’s requirements. On May 15, 2003, Ohaus Corporation, USA, was re-registered to the ISO 9001:2000 standard.

Registro ISO 9001

Enregistrement ISO 9001
Disposal
In conformance with the European Directive 2002/96 EC on Waste Electrical and Electronic Equipment (WEEE) this device may not be disposed of in domestic waste. This also applies to countries outside the EU, per their specific requirements.

Please dispose of this product in accordance with local regulations at the collecting point specified for electrical and electronic equipment.

If you have any questions, please contact the responsible authority or the distributor from which you purchased this device.

Should this device be passed on to other parties (for private or professional use), the content of this regulation must also be related.

Thank you for your contribution to environmental protection.

Eliminación de residuos
De conformidad con las exigencias de la directiva europea 2002/96 CE sobre residuos de aparatos eléctricos y electrónicos (RAEE), este equipo no puede eliminarse como basura doméstica. Esta prohibición es asimismo válida para los países que no pertenecen a la UE cuyas normativas nacionales en vigor así lo reflejan.

Elimine este producto, según las disposiciones locales, mediante el sistema de recogida selectiva de aparatos eléctricos y electrónicos.

Si tiene alguna pregunta al respecto, diríjase a las autoridades responsables o al distribuidor que le proporcionó el equipo.

Si transfiere este equipo (por ejemplo, para la continuación de su uso con fines privados, comerciales o industriales), deberá transferir con él esta disposición. Muchas gracias por su contribución a la conservación medioambiental.

Elimination
En conformité avec les exigences de la directive européenne 2002/96 CE relative aux déchets d’équipements électriques et électroniques (DEEE), cet appareil ne doit pas être éliminé avec les déchets ménagers. Logiquement, ceci est aussi valable pour les pays en dehors de l’UE conformément aux réglementations nationales en vigueur.

Veuillez éliminer cet appareil conformément aux prescriptions locales dans un conteneur séparé pour appareils électriques et électroniques.

Pour toute question, adressez-vous aux autorités compétentes ou au revendeur chez qui vous avez acheté cet appareil.

En cas de remise de cet appareil (p. ex. pour une utilisation privée ou artisanale/industrielle), cette prescription doit être transmise en substance.

Merci pour votre contribution à la protection de l’environnement.

1. INTRODUCTION

The Scout Pro offers parts counting with auto optimization, display hold, totalize and % weighing. Models are available with ranges from 200g to 6000g.

Scout Pro standard features include:
- Battery or AC operation (AC adapter included)
- Integral security bracket
- Programmable auto shut-off
- Span calibration masses included on certain models
- Optional USB or RS232 interface available

Safety Precautions

Please follow the safety precautions as listed:

CAUTION:
- Do not operate the balance around corrosive fumes.
- Use only the adapter provided with the balance.
- Do not try to service the Scout Pro balance.
- Before plugging in the balance, make sure that the voltage rating of the power adapter and the AC supply voltage match.

2. INSTALLATION

Unpacking

Inform your Ohaus dealer if parts are missing.

Your Scout Pro package contains:
- Scout Pro Balance  •  Warranty card  •  AC Power Adapter  •  Platform
- Instruction Manual  •  Calibration Masses (on certain models)

Store the packaging material for future transport.
Installing Components

Releasing the Shipping Lock
On top of the balance, turn the pointer 90 degrees counter-clockwise to unlock.

Platform Installation
Balances with a rectangular platform are placed into the subplatform as shown and rotated counter-clockwise until it locks. Round platforms are placed straight down on subplatform.

Security Bracket
A security bracket is provided at the rear of the balance allowing the balance to be secured by an optional cable and lock accessory.

Selecting the Location
For best performance, the Scout Pro balance should be used in a clean, stable environment. Do not use the balance in environments with excessive drafts, with rapid temperature changes, near magnetic fields or near equipment that generates magnetic fields, or vibrations.

Balances with Level Adjustment
Balances containing leveling feet and a bubble level must be leveled before using. See illustration for correct leveling.
Connecting Power
Battery Installation
Install the Four “AA” batteries with polarity as shown in the battery compartment.

AC Adapter Installation
Plug the AC adapter into the jack at the rear of balance.

</tr>
</tbody>
</table>
Symbols Used for Operation of the Balance

Symbols are used to simplify the setup and operation of the balance. A description of each symbol follows:

- **Press**
  - The clock symbols adjacent to the finger symbol indicates the length of time to press a button.
  - 1 second momentary press.
  - 3 second extended press.
  - 5 second extended press.

- **Panel control buttons used to initiate actions.**

- **Displays are shown as they actually appear on the balance. A model with 200g capacity was used for the displays shown in this manual.**

- **•••** Indicates scrolling to a final display. The first and last displays are shown.

- **Indicates advances to next display.**

### Turning the Balance On

- **1 second momentary press.**

### Turning the Balance Off

- **3 second extended press.**

Entering the Menus

There are four main menus in the balance: **C.A.L.**, **S.E.T.U.P.**, **U.N.I.T.S.** and **E.N.D**.

Start with the balance off and the Lock Switch off (see page 21).

The sequence is shown below.

Accepting / Bypassing an Individual Menu Item

Start with menu item displayed.

(Short presses advances through menu)
Entering the **S.E.T.U.P.** Menu

The **S.E.T.U.P.** menu contains Auto-Off, LFT (in certain models), Linearity Calibration, Mode (Display Hold, Totalize) and END. Auto-Off and LFT can be turned on or off. Display Hold, and Totalize require entering the Mode submenu. Starting from the **C.A.L.** menu.

---

**(First menu)**

Select ON or OFF for Auto-Off or LFT. To enter Display Hold or Totalize, you must first enter the Mode sub-menu.

---

Turning Display Hold or Totalize Mode On

**NOTE:** Only one mode can be active at one time.

Start at the **S.E.T.U.P.** menu.

---

Press YES to desired mode, then continue.
Exiting the **S.E.T.U.P.** Menu

Select ON/OFF or YES/NO to desired menu items, proceed to **E.N.D.** menu.

(Short presses)

![Print Unit] ![End]

![Print Unit] ![Un. It.]

![Print Unit] ![End]

Entering the **U.N.I.T.** Menu

The **U.N.I.T.** menu contains units of measure, PC (parts counting), % weighing and END. Units vary with the model type. Determine which units are to be turned on or off.

Start in the **U.N.I.T.** menu. Select either ON or OFF for each unit.

![Print Unit] ![Units g]  

**[To advance]**

![Print Unit] ![Units oz]

**NOTE:** Repeated presses of **Print Unit** button will go through all units, you then may select ON or OFF. Parts Counting is slightly different.
Parts Counting

Two types of counting modes are available, standard or enhanced.

Exiting the .U.N.I.T. Menu

Use the same procedure as Exiting the .S.E.T.U.P. Menu.

Calibration

Span Calibration

Span calibration uses two calibration points, zero and a specified calibration weight. Before beginning calibration, make sure the Lock Switch is off. Clear the platform.

NOTE: Value of calibration mass depends on capacity of balance. After calibration, the balance returns to the currently selected weigh mode.

Start with the balance OFF.

(Release button)

(Place mass value on platform)

(Example)
Span Calibration (Cont.)

(line Remove mass)

(Linearity Calibration
Linearity calibration uses three calibration points; zero, mid-scale and full scale.
Lin Cal must be selected and set to YES in the .S.E.T.U.P. Menu. Before beginning calibration, make sure the menu Lock Switch is off. Clear the platform.
Start with the balance OFF.

(Place mass value on platform)

(Place mass value on platform)

(Remove mass)

* 200.00 g

Applications

Scout Pro applications include: Weighing, Parts Counting, Percent Weighing, Display Hold and Totalize.

Weighing

Start with the balance on.

Weighing with Tare

Taring zeros the container weight. With the balance on, place an empty container on the platform. (Display example indicates a container weight of 23g.)

NOTE: Removing the container and material from the platform will cause the balance to display the container’s weight as a negative number. The tared weight remains until ON/ZERO Off button is pressed again or the balance is turned off. (Remove container with material)
**Parts Counting**

Parts Counting is *enabled only* when PC is turned ON in the .U.N.I.T. menu. In parts counting mode, there are two modes of parts counting, normal and enhanced. In normal parts counting, the balance determines the quantity based on the average weight of the parts in the original reference quantity. In the enhanced mode, additional parts can be added to the platform equal to or less than the original number. The additional reference quantity produces a more accurate average part weight.

**Standard Parts Counting**

(Press and hold until PC is displayed)

![Units PC](image)

(Clear average part weight)

![Clr.APu](image)

(Press repeatedly to change to 10, 20 or 50)

![Set 5](image)

(Add parts to be counted)

![Set 50](image)

(Place 50 parts)

![50 PC](image)

**Enhanced Parts Counting**

(Add less than 50)

![75 PC](image)

(Add parts to be counted)

![75 PC](image)

![1500 PC](image)

**NOTE:** The preceding procedure for enhanced counting can be repeated as many times as necessary providing the quantity added is less than the original entry.
Parts Counting (Cont.)

To count different parts, press and hold, until PC reappears, release Unit button.

Percent Weighing

Percent Weighing is *enabled only* when Percent is turned ON in the .U.N.I.T. menu. Percent weighing permits placing a reference weight on the balance, then viewing other loads as a percentage of the reference. The reference weight equals 100%. Start in the weighing mode and zero the display.

(Press and hold until % is displayed)

(Place load on the platform, display indicates percentage of reference weight.)
Establishing a New Reference Weight

Press and hold until % on the display reappears, then release.

Repeat above procedure for new a reference weight.

Exiting Percent Weighing

Press and hold until desired unit is displayed.

Display-Hold

Display-Hold is enabled only when Hold is turned ON in the Mode submenu in the .S.E.T.U.P. menu. Display-Hold mode captures and stores the highest stable value. When displayed, the stable icon will blink. **NOTE:** Units cannot be changed when in Display-Hold mode.

Place item(s) on platform.
Exiting Display Hold

To return to display hold, repeat above procedure.

Totalize

Totalize is *enabled only* when Total is turned ON in the Mode submenu in the .S.E.T.U.P. menu. Totalize allows storage of a series of weight measurements. Totalize mode has been initiated when "Y" and the current unit, i.e. (g) is displayed. When totalized weight is shown, the "Y" indicator will blink. **NOTE:** Units cannot be changed when in Display-Hold mode.

Total weight will remain on the display until weight is removed. The total weight remains in memory. Total is limited to 9999999.
Clear/Exit Totalize
Performing this next step will erase all totalized memory.

![Clear/Exit Totalize](image)

Additional Features

Weigh Below
Scout Pro permits below balance weighing for applications such as specific gravity/density determination. The balance is normally elevated, supported on all feet and leveled. A fine wire is attached to the built-in hook at the bottom of the balance (see illustration).

LFT (Legal for Trade on certain balances)
When LFT is activated, balance parameters such as Linearity Calibration, and various units of measure are turned off as required for local weights and measures approval. Review Lock Switch and Sealing the Balance procedures on page 21 before proceeding.
To initiate LFT, start in the .S.E.T.U.P. menu.

![LFT](image)
Lock Switch

The Lock Switch is located under the balance and operates two different ways depending on the model. In LFT models, the Lock Switch locks the calibration settings and other parameters required for approval. In non-approved models, the Lock Switch is used to lock out the menu mode preventing unauthorized changes.

To lock the menus, position the Lock Switch next to the tab on the bottom of the balance as shown.

Sealing the Balance

After a weights and measures official has tested and approved the scale, it must be sealed.

With the Lock Switch in the ON (locked) position, pass the sealing wire through the hole in the Lock Switch and the tab and secure with a lead seal or paper seal. See illustration.
4. MAINTENANCE

Cleaning
To ensure proper balance operation, keep the housing and platform clean. If necessary, a cloth dampened with a mild detergent may be used. Check under the platform for debris and remove. Keep calibration masses in a safe dry place. Unplug the AC Adapter when not in use. For long term storage, remove the batteries.

Troubleshooting

**Weighing modes**: %, Parts Counting - Units, see capacity/readability table

**Tare range**: To capacity by subtraction

**Over range capacity**: Capacity +90d

**Stabilization time**: 3 seconds

**Operating temp. range**: 50° - 104°F / 10° - 40°C

**Power requirements**: AC Adapter (supplied) or 4 AA batteries (not included)

**Calibration**: Digital calibration from keypad

**Display (in/mm)**: LCD (0.6 / 15 high digits)

**Pan size (in/mm)**: 4.7 / 120 diam.  6.5 x 5.6 / 165 x 142

**Dimensions WxHxD (in/mm)**: 7.5 x 2.2 x 8.3 / 192 x 54 x 210

**Net Weight (lb/kg)**: 1.5 / 0.7  1.8 / 0.8

LIMITED WARRANTY

Ohaus products are warranted against defects in materials and workmanship from the date of delivery through the duration of the warranty period. During the warranty period Ohaus will repair, or, at its option, replace any component(s) that proves to be defective at no charge, provided that the product is returned, freight prepaid, to Ohaus.

This warranty does not apply if the product has been damaged by accident or misuse, exposed to radioactive or corrosive materials, has foreign material penetrating to the inside of the product, or as a result of service or modification by other than Ohaus. In lieu of a properly returned warranty registration card, the warranty period shall begin on the date of shipment to the authorized dealer. No other express or implied warranty is given by Ohaus Corporation. Ohaus Corporation shall not be liable for any consequential damages.

As warranty legislation differs from state to state and country to country, please contact Ohaus or your local Ohaus dealer for further details.
